

KENT STATE  
UNIVERSITY  
EAST LIVERPOOL

To whom it may concern:

It gives me satisfaction to recommend Amy Hissom for approval to teach computer technology courses at the Kent State University-East Liverpool Campus

I have had the opportunity to work with Amy as both her instructor as well as witnessing her development in creating multimedia elements and web sites in an entrepreneurial role. As a student, her work ethic and commitment to education exceeds the level of most of her counterparts. Her understanding of technology and desire to learn has made her an enjoyable student to work with. As I graduate student, Amy asked me on several occasions to review and provide feedback to her projects, instructional design, and implementation of technology into education.

Prior to becoming a student, Amy had a background in creating and selling items with the use of digital photography. As she progressed in her education, her skills expanded allowing her to include web site development, interactive multimedia, and even assisting in online course development. She began her own business and currently works with several businesses and organizations creating and updating their content.

From her ability as a studious learner combined with her ability to relate the concepts to practical applications, I feel quite confident in Amy's ability to successfully instruct computer technology courses. It has been an honor to see her development during the time I have had to work with her, and I look forward to seeing her expand her abilities both in the education as well as professional world.

Sincerely,

Shawn Golden  
Professor of Computer Technology  
Kent State University-East Liverpool Campus
